

What is the K3|desktop for Sage200?

The K3|desktop for Sage 200 is a secure hosted desktop platform created to deliver Sage to any business. It helps partners to provide added value and competitive service to customers through rapid Sage200cloud deployment, while also delivering exceptional performance, remote working capability and cybersecurity.

Our partners receive the K3|desktop for Sage 200 with all essential business applications and components installed and ready to configure, so your customers can immediately start benefiting from the benefits of Sage200cloud.

Your reputation is in safe hands with K3, too. The K3|desktop is backed by our cybersecurity, backup and recovery measures and the platform is managed and maintained by our specialist team. And with no CAPEX spend or microtransactions, it's accessible to all manner of customers.

What are the features and benefits?

- A powerful, fast, secure and resilient cloud platform delivers enterprise-class performance and helps you to provide an even better Sage experience
- Available with essential business applications and components installed – including the Sage application, SQL database and remote desktop services – for seamless setup and integration
- Networking and server protection built in
- 24/7 platform support service for all partners*

How much does it cost?

Prices vary depending on the contract cover option you choose. All options are available as fixed monthly payment plans with no upfront costs.

*Platform only support as standard. The Customer must have K3 support service in place or accept additional support fees.

The "Platform" is recognised as the K3 environment, Servers, Storage and networking delivering the server. K3 is not responsible for customers applications, server operation system or data integrity. Additional support is available.
