

What is our email filtering managed service?

K3 deploys and manages mail filtering technologies to protect your network from external threats, including spam, phishing, whaling and ransomware, by filtering harmful emails and their content before they reach your inbox. This prevents email-delivered viruses and spyware from infecting servers, PCs and laptops and enables you to lower your risk against some of the most common and devastating cyberthreats.

This first line of defence is continually monitored by our expert team, to ensure consistent, optimal performance and absolute peace of mind.

What are the benefits?

- Lower your risk against spam, phishing, whaling and ransomware attempts to protect business finances, stability and brand
- Spend less time manually filtering emails and rely less on colleague interception
- Maintained and monitored by an expert partner
- Reporting and notifications to provide awareness of where extra cybersecurity, investment or training may be needed
- 24/7 helpdesk support to resolve queries or concerns quickly and efficiently, aiding productivity and reducing downtime

How much does it cost?

Prices vary depending on the contract cover option you choose. All options are available as fixed monthly payment plans with no upfront costs.

Please call us on **0844 579 0800** to discuss your specific requirements.
