

▾ What is our firewall managed service?

Using the latest in SonicWall technologies, K3 delivers a market leading managed firewall service to ensure your business is protected from internet-based threats. Our firewalls shield you from viruses and other malware, identifying and blocking attacks in real time, while our team of experts proactively monitor activity to ensure optimal performance and visibility.

Our managed service means you can benefit from the precision and proactivity that comes with specialist knowledge and have peace of mind that nothing will slip the net. Your IT team can also be freed up to focus on business needs, while we take care of installation, updates and management.

▾ What are the features and benefits?

- Fully configured SonicWall security appliance provided, so there are no delays in getting protected
